ERGOtouch HANDLES FOR MOUTH MIRRORS

ERGOtouch Handles

made out of satin-finished stainless steel are hollow and thus ensure low-fatigue work. The grip recess and the design with maximum grip allows safe holding while the satin-finished surface eliminates disturbing glares.

The coloured handle ends are made out of glassfiber-reinforced plastic material that is successfully used in practice since 2015. The material is autoclavable, colour- and shape-stable as well as resistant against acids and plaque-indicators.

ERGOtouch Explorer

made out of surgical steel according to EN ISO 7492 ensures a high bending strength and flexibility.

The Explorers are permanently fixed.

Autoclavable up to 134°C

ERGOtouch | Handles and Explorers | each

The Explorers are permanently fixed.
